WALLOWA-WHITMAN NATIONAL FOREST TRAVEL PLAN

Effective September 1, 1988 Until Rescinded

We have established a minimum number of restrictions governing the use of motorized vehicles in order to enhance your visit and to protect the resources of the Wallowa-Whitman National Forest.

You, the public, have expressed many special management concerns, and we have listened. The roads, trails and areas affected by the Wallowa-Whitman National Forest Travel Plan are shown on both sides of this map, and are keyed by a number to a brief description of the purpose, dates and type of restriction. National Forest system lands not specifically listed are open to motorized use. However, I may sometimes find it necessary to limit use temporarily on some areas, trails or roads during hazardous periods or when use would damage Forest resources. At such times, we will give prior public notice of these restrictions, and post them on the ground. District Rangers may also authorize temporary exceptions to these closures by permit, license or contract.

Except as noted, you are permitted direct ingress and egress to temporary campsites within 300 feet of designated open routes. Please select your routes carefully in order to avoid damage to the land, vegetation or streams, and do not cut live trees.

There are many parcels of privately owned land within the Forest boundary. Please respect the property owner's rights, and if you wish to enter private land, check with the owner first.

If you have questions, please call or visit any of the offices listed below.

Sincerely,

R M Richmond

OBJECTIVES ON ROAD, TRAIL AND AREA CLOSURES

A. Make additional habitat available where big game can easily find rest, shelter and temporary escape from otherwise highly mobile hunters, thereby reducing stress, and helping to insure that the animals survive the season in better physical condition.

B. Provide additional area for a primarily foot and/or horseback oriented hunting experience.

C. Provide an area for a foot and/or horseback traveling experience.

D. Protect fragile soils, both on and adjacent to existing roads and trails, from eroding, and maintain existing soil rehabilitation measures.

E. Establish administrative control at a logical point on an access route into an established wilderness.

F. Maintain high quality big game calving, fawning and rearing areas.

G. Prevent harassment of big game while on their winter range.

H. Reduce harassment of waterfowl, shore birds, raptors or other birds during their nesting season.

I. Protect and maintain the quality of water used for municipal needs.

J. Protect scientific experiments.

K. Provide for public safety and avoid conflict with established users.

L. Comply with existing law.

M. Establish administrative control at a logical point on existing access route into an area with travel restrictions.

N. Provide an opportunity for motorized snowplay.

O. Provide management and protection for the Oregon Trail.

DEFINITIONS

Open Route: Those roads and trails within an area closure which are generally open to all forms of motorized vehicles. In most big game-related area closures, these open roads are designated by green reflectorized dots. Except as noted, a 300 foot corridor on each side of a designated open route is also available for camping.

Open trails can be used by trail vehicles in addition to horse and foot traffic.

Trail Vehicle: A motorized vehicle, 40 inches or less in width.

Motorized Vehicle: Any vehicle propelled by an internal combustion, turbine or jet engine, or electric motor.

Over-snow Vehicle: A motorized vehicle that is specifically designed for, and has the ability to, travel on top of snow.

Snow Grooming Equipment: Generally, a track-laying vehicle with an enclosed cab, that is, a snow cat, often used to pack a path through deep snow, or pull a track setter, which grooves a parallel set of trails, one for each of a pair of cross-country skis.

DEFINITIONS

Open Route: Those roads and trails within an area closure which are generally open to all forms of motorized vehicles. In most big game-related area closures, these open roads are designated by green reflectorized dots. Except as noted, a 300 foot corridor on each side of a designated open route is also available for camping.

Open trails can be used by trail vehicles in addition to horse and foot traffic.

Trail Vehicle: A motorized vehicle, 40 inches or less in width.

Motorized Vehicle: Any vehicle propelled by an internal combustion, turbine or jet engine, or electric motor.

Over-snow Vehicle: A motorized vehicle that is specifically designed for, and has the ability to, travel on top of snow.

Snow Grooming Equipment: Generally, a track-laying vehicle with an enclosed cab, that is, a snow cat, often used to pack a path through deep snow, or pull a track setter, which grooves a parallel set of trails, one for each of a pair of cross-country skis.

OBJECTIVES OF ROAD, TRAIL AND AREA CLOSURES

A. Make additional habitat available where big game can easily find rest, shelter and temporary escape from otherwise highly mobile hunters, thereby reducing stress, and helping to insure that the animals survive the season in better physical condition.

B. Provide additional area for a primarily foot and/or horseback oriented hunting experience.

C. Provide an area for a foot and/or horseback traveling experience.

D. Protect fragile soils, both on and adjacent to existing roads and trails, from eroding, and maintain existing soil rehabilitation measures.

E. Establish administrative control at a logical point on an access route into an established wilderness.

F. Maintain high quality big game calving, fawning and rearing areas.

G. Prevent harassment of big game while on their winter range.

H. Reduce harassment of waterfowl, shore birds, raptors or other birds during their nesting season.

I. Protect and maintain the quality of water used for municipal needs.

J. Protect scientific experiments.

K. Provide for public safety and avoid conflict with established users.

L. Comply with existing law.

M. Establish administrative control at a logical point on existing access route into an area with travel restrictions.

N. Provide an opportunity for motorized snowplay.

O. Provide management and protection for the Oregon Trail.
